Education

Amrita Vishwa Vidyapeetham

Bachelor of Technology, Computer Science & Engineering

2024 – 2028

Coimbatore, India

Projects

Eye Disease Prediction | GitHub

Machine Learning, Computer Vision

- Built and trained a CNN-based deep learning model using TensorFlow/Keras to classify retinal fundus images into 7 eye disease categories, applying image preprocessing and augmentation to improve generalization.
- Deployed the trained model using TensorFlow.js for real-time browser-based inference, enabling client-side predictions without backend dependency.

CodeFlow | GitHub

React, TypeScript, Firebase

- Developed a cloud-based online code editor using React and TypeScript with secure authentication and real-time code execution.
- Integrated Firebase Authentication and Firestore to enable persistent, user-specific code storage with scalable session management.

Foretype | GitHub

Python, Data Structures, CLI Tool

- Designed and implemented a high-performance autocomplete engine using Trie and Bloom Filter for efficient prefix search and memory optimization.
 - Built adaptive frequency-based ranking with persistent storage to personalize suggestions and maintain learned user behavior across sessions.
-

Technical Skills

Areas of Interest: Machine Learning, Web Development, Problem Solving

Programming Languages: C, Java, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, React

Databases: MySQL

Tools & Platforms: Git, GitHub, Visual Studio Code, Firebase, Supabase, Arduino, Obsidian

Certifications

- Automated Machine Learning for Beginners (Google and Apple) - Udemy
- Basics of Data Structure and Algorithm — Simplilearn SkillUp
